

H-RS-B

Halo rack mount shelves provide space for non-rack mounted components allowing you to more fully integrate your system.

Designed specifically to fit in the angled bays of Halo, these shelves can be used by themselves or in combination with standard rack mount gear.

The 40° incline provides optimal line of sight to controls with convenient access to plugs and cabling.

Shelves are 4 RU spaces x 17.3" (438mm) wide, 8.8" (224mm) deep. Made from steel with powder coat finish, each shelf has a 50 lb capacity.

*2.6" [67mm] restricted clearance on shelf when mounted in upper most rack position.
